Interview 1) Student with a tight class schedule

- Behavior: Due to the tight schedule, this student has to eat lunch on campus, so they are part of the target demographic for our project.
- Behavior: They aren't picky with their choices, so anything from the union or around would have been best to them.
- Opinion: Wants to be able to choose a place with the information avaialable actually being current.

Interview 2) Student balancing budget and dietary preferences

- Behavior Had their preference of vegetarian and wasn't able to get what they wanted.
- This student had more time on their hands to go out and venture beyond campus, especially to satisfy their cravings and preferences.
- Behavior: They can afford to spend more if the food they want was more expensive.
- Opinion: Would be open to an app that can help them find exactly what they are looking for so they don't waste time and don't have to look off campus instead.

Interview 3) Student who prefers familiar routines

- Opinion: This person mentioned how they didn't really look over menus or times and just went to eat what they were feeling in the moment.
- Opinion: They mostly stuck to places they already knew on campus instead of venturing into other new areas.
- Behavior: They have no restrictions or dietary preferences besides visiting the same places in the union.
- Opinion: They would be open to using our application but would rather just keep doing their same routines.
